Quantity To Use

The following quantities will be practical on most lawn mixtures. For new lawns, use 1 lb. to 250 sq. ft., 4 lbs. to 1000 sq. ft. For replenishing old lawns we recommend about one-third to one-half this quantity of seed.

Brainard's Rex Mixture

This is our very best mixture for general use and is actually a blend of a number of high grade grasses most suitable to withstand the close cutting, extremes of weather and other adverse conditions ordinary lawns have to endure. This mixture will positively, under favorable conditions produce a permanent, fine texture lawn. 1 lb. \$1.20, 2 lbs. \$2.40, 3 lbs. \$3.60, 5 lbs. \$6.00, 10 lbs. \$11.80, 15 lbs. \$17.70, 25 lbs. \$29.00, 50 lbs. \$57.50, 100 lbs. \$113.00.

Brainard's Verigood Mixture

This is a mixture of good, serviceable lawn grasses, and while not quite equal in velvety texture to our Rex Mixture, is less expensive and answers well where a high quality, fine bladed grass is not really necessary. 1 lb. 90c, 2 lbs. \$1.80, 3 lbs. \$2.70, 5 lbs. \$4.50, 10 lbs. \$8.80, 15 lbs. \$13.20, 25 lbs. \$21.50, 50 lbs. \$42.50, 100 lbs. \$83.00.

Brainard's Shady Corner

This mixture is composed of dwarf growing, strong rooting grasses which thrive more or less in sheltered or shaded locations, and will make a quick showing though gradually build a strong green turf. 1 lb. \$1.05, 2 lbs. \$2.10, 3 lbs. \$3.15, 5 lbs. \$5.25, 10 lbs. \$10.30, 15 lbs. \$15.45, 25 lbs. \$25.25, 50 lbs. \$50.00, 75 lbs. \$75.00, 100 lbs. \$98.00.

The following Hybrid varieties in their respective seasons from earliest to late represent the most popular and most planted varieties for commercial purposes. Taken into consideration is time of maturity, size of ear, quality and appearance of ear, keeping qualities and, of great importance to the commercial grower, the yield.

HERE IS A GARDEN SUGGESTION

Instead of planting a couple of varieties of Sweet Corn in a hit or miss schedule resulting in some days without corn and some with too much, why not try a package of our "SWEET CORN ALL SUMMER." In this package is a packet each of 5 Sweet Corn Hybrids all listed on this page. Plant them all at one time and have a complete succession of Sweet Corn from early to late. Varieties are

Priscilla

Washington
Golden Cross Bantam

Grant

Wilson

Each packet will plant 20 to 25 hills, or the 5 packets are sufficient for approximately 125 hills of Corn.

PEAT MOSS

Horticultural Grade—Nature's Mulch and Soil Builder

A thoroughly decayed, natural material contributing to the formation of humus, and valuable for all types of soils. Used in sandy soils to add fiber and make more moisture retaining properties, and in heavy or clayey soils its action is to make a more friable and better drainage condition. By the retaining of proper moisture content in the soil, the fertilizers are more promptly available and retained so that roots can feed on it as needed. Peat Moss is also a wonderful preventative of soil leaching.

Peat Moss is an especially useful material in the preparation of soil for all broadleaved evergreens, such as Laurel, Rhododendrons, Azaleas, and many others, and liberal quantities of it should be thoroughly worked into the soil before planting.

Newly planted trees, shrubs, and especially evergreens of all types, are very much benefited by a liberal mulch of Peat Moss, and each Spring the last year's mulch should be worked into the soil and a new mulch applied. It is also of value as a mulch for perennial beds, Rose beds, etc.
